

Jordan Lee
Senior Full-Stack Engineer

Summary

Full-stack engineer with 6+ years of experience building SaaS analytics products with React, Python, FastAPI, PostgreSQL, and AWS. Strong background in API design, data visualization, and cross-functional delivery.

Experience

Senior Software Engineer, Northstar Metrics

2021 - Present

- Built React dashboards used by 3,500+ weekly users and improved report load time by 42%.
- Designed REST API services with FastAPI, PostgreSQL, Redis, and Docker.
- Led migration from manual deployments to CI/CD pipelines on AWS, reducing release time by 60%.
- Partnered with product and design teams to ship accessible analytics workflows.

Software Engineer, BrightOps

2018 - 2021

- Developed Python ETL jobs for customer data pipelines and analytics exports.
- Created SQL models and Tableau dashboards for customer success teams.
- Improved test coverage across core services and reduced production incidents by 25%.
